

An open ecosystem to strengthen public transit systems

Open Fleets is Spare's unique, proprietary software infrastructure designed to connect trip demand to any fleet provider that you use. Our advanced features and Open API make it easy and quick to unify multiple fleets, regardless of who is operating them, from a single platform.

A feature-rich platform

Reservations, dispatch & scheduling

Live monitoring and reporting

Centralizing third-party fleet management

Optimize non-dedicated fleet usage

Unlock new benefits

Improved rider experience

Introduce service with less wait times and more spontaneity—bringing autonomy at a fraction of the cost.

Dynamically increase capacity

Expand service coverage, manage supply during peak periods, optimize the usage of WAV vehicles, or offer overflow service to meet same-day demand.

Lower cost per-trip

Use dedicated fleets or dispatch trips to taxis or TNCs in your region, on-demand to reduce costs.

Curb driver shortages

Fortify your services by supplementing dedicated fleets with non-dedicated service providers in your community.

Control operational costs

Manage spending on non-dedicated fleets using built-in tools that configure fleet priorities and control costs.

Your service, your choice

Optimize dedicated vs. non-dedicated fleets based on business and rider needs, while our backend algorithms route each vehicle.

What our customers say

Operational cost-savings with Collin County Transit, Texas

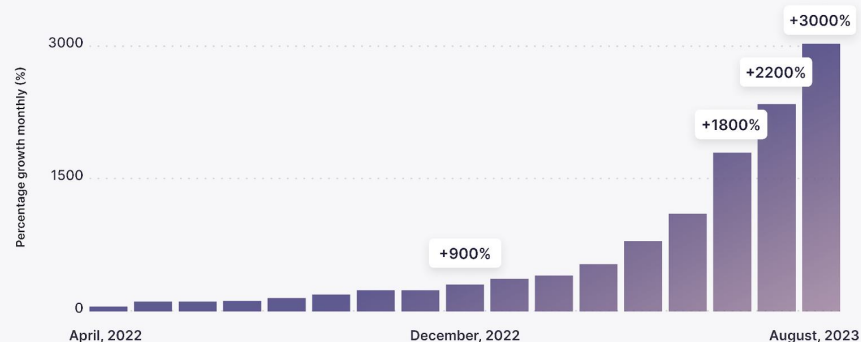

Spare powers a cost-effective on-demand transit service that leverages a mixed fleet supply, more pooling, and a stop-to-stop configuration in McKinney, Texas. Leveraging Spare's technology, CCT was able to **cut operational costs by 52% per ride** when using Lyft to supplement their dedicated fleet, saw **300% ridership growth** since its launch in January 2022, and has **decreased rider wait time by 50%** across its large service area of ~900 square miles.

Improved service efficiency & rider experience with Pinellas Suncoast Transit Authority, Florida

In partnership with PSTA, Spare powers the most innovative paratransit service in North America: Mobility on Demand. With Spare's technology and Open Fleets infrastructure, PSTA integrated 5 dispatch platforms and 6 fleet providers into one platform for all reservations, scheduling, dispatching, communications and reporting. Within the first three months of offering MoD to the PSTA Access mobile app, it achieved **95% OTP, 95% rider satisfaction**, and **increased in-app bookings by 192%**

Monthly % trip growth as of August 2023 since its launch in late 2021, Spare Open Fleets is powering millions of NDSP boardings per year.
